Inspiration Technology

¹For hard drives, GB=billion bytes. ²8X DVD-ROM drives read a minimum of 3,600 Kbps and a maximum of 10,800 Kbps, speeds may vary. For recording to CD-R media the data transfer rate may be up to 1,200 KB/s (Use 8X or higher discs for best performance.); for writing to CD-RW media, the max transfer rate may be up to 600 KB/s (Use 1-4X discs for best performance. This drive does not support the high-speed 4-10X CD-RW discs); for reading CD media, the max transfer rate may be up to 4,800 KB/s. Actual transfer rates will vary depending on media quality. ³ITU V.90 modems are designed only to allow faster downloads from K56flex or V.90 compliant digital sources. Maximum achievable download transmission rates are currently unknown, may not reach 56 Kbps, and will vary with line conditions.
